

INCREASE EQUITABLE ACCESS TO QUALITY FOR MORE CHILDREN

THE
NE³W
SCHOOL
Elevated Early Education

High quality early education increases the readiness of all children and narrows the achievement gap. The early years are a critical time in language and literacy development.

OUR STORY

Over nine years ago, The New E3 School located in the Park Place neighborhood of Norfolk, Virginia was created by E3: Elevate Early Education for children ages one to five. E3 worked with the City of Norfolk, business, civic and philanthropic leaders to create a prototype mixed-income model to drive awareness, advocacy, innovation and impact for all children across the region and state. Our school is a “show and tell” early education model that led to policy change and increased state investment to ensure more children have access to quality programs.

We have proven year after year that when children have access to high quality early learning, they enter kindergarten ready with the academic and social skills they need to thrive.

E3 funded and partnered with the University of Virginia to develop and implement the STREAMin3 curriculum model in our school. Ultimately, our goal was to ensure the model was replicable and scalable to impact even more children, teachers and programs. E3 raised awareness and advocated for STREAMin3 to be adopted and available through the Virginia Department of Education. **Over 4,000+ classrooms are using the model.**

OUR RESULTS

The New E3 School's Spring 2023 Quality, Literacy + Readiness Report prepared by UVA tells us:

- Our teachers are engaged in high-quality interactions with children.
- The quality is consistent and strong in all classrooms.
- CLASS scores exceed those from other preschool classrooms in Virginia.
- **Most three-and-four-year-old children are meeting or exceeding** benchmarks in math, social skills and self-regulation.
- **More three-and four-year-old children** need support in literacy.

This is the second year that we are seeing more children not meeting literacy benchmarks. Research shows that the pandemic caused an uptick in developmental delays. We are concerned and teamed up with early literacy experts to address the language and literacy gaps in young children.

THE IMPACT

Over 900+
children
impacted.

93 children
received
scholarships.

Over \$2.3m
raised for
scholarships.

Our model has impacted
thousands of children,
teachers and programs.

THE NEED

141 children from low-and-middle income families are on the waiting list and need a scholarship to have the opportunity to attend. Every family pays a portion of the tuition based upon what they can afford.

The New E3 School needs to raise **\$300,000 for 30 children**. Your gift will provide a scholarship and give them equitable access to the high-quality early education that they need and deserve.

THE GIVING LEVELS

\$50,000 provides a scholarship for a child from ages one to five.

\$25,000 provides a scholarship for a middle-income family.

\$10,000 provides a scholarship for one year for a child.

\$5,000 provides a partial scholarship.

\$2,500 provides financial assistance.

\$1,000 provides a scholarship in partnership with other donors.

EVERY DOLLAR COUNTS! GIVE TODAY.
